Net Content:
500ml

KEEP OUT OF REACH OF CHILDREN

HARMFUL

Opal® 7.5 EC is a systemic triazole fungicide containing 75 g/L Epoxiconazole. It has preventive, curative and eradication action. It is quickly absorbed and translocated acropetally to the sites of infection including an immediate stop the disease infection.

DIRECTIONS FOR USE: When spraying, wear appropriate Personal Protective Equipment (PPE) including chemical resistant gloves, face mask, eye protection, boots, coverall and trousers. Wash body with soap and water after spraying. Only use manual knapsack sprayer during application at a rate of 400 L/Ha. Use not more than 2 applications per season.

CROP	DISEASE	DOSE RATE		APPLICATION INTERVAL
		ml/ ha	Tbsp/ 16L	
Rice	Sheath blight	500	5*	12-14 Days

1 tbsp = 10ml

*Based on 160L/ha spray volume

MIXING: Fill 30% of the total water to knapsack sprayer. Add the recommended rate of **Opal® 7.5 EC** (50ml/ 16L water), then agitate. Add the rest of the water to complete the total volume.

COMPATIBILITY: Compatible with most pesticides used in rice.

PRE-HARVEST INTERVAL: 1 month

RE-ENTRY PERIOD: After spray deposits have dried.

STORAGE AND DISPOSAL: Store in original container, tightly closed, away from food and feeds. Store in a well-ventilated place. Keep out reach of children. Harmful to fish and other aquatic organisms. Do not contaminate waterbodies with this product. Triple rinse container and dispose contents/empty container to hazardous or special waste collection point or in accordance with national and local regulations and requirements.

PROHIBITION AND WARRANTY: It is a violation of FPA rules and regulations to use this product in a manner inconsistent with its label. No warranty of any kind expressed or implied, is made concerning the use of this product. User assumes all risks and liabilities resulting from handling, use or application. It is important to read this label before spraying.
