

Volley®

Fungicide

 **BASF**

We create chemistry

PRODUCT DESCRIPTION

Commercial Brand: **Volley®**
Active Ingredient: **Fenpropimorph**
Family: **Morpholines**
Group: **Amine**
Mode of Action: **Systemic**
Mechanism: **Multisite**
Activity: **Preventive and Curative**
Formulation: **Liquid miscible in Oil**
Concentration: **880 g/l**
Maximum Cycle: **15 cycles/year**
Rate: **0.5 - 0.7 liters per ha**

UNIQUE CHARACTERISTICS

- 1 **Genuine Resistance Breaker**
- 2 **Most Advanced Amine Fungicide**
- 3 **Guaranteed Zero Phytotoxicity**

Fungicide Resistance Management Program

BASF offers different products with different modes and target sites of inhibition which provides an excellent fungicide resistance management program

CABRIO™ 25 EC
Strobilurin Benchmark
